DETAILED ACTION

This Office Action is in response to the Applicant's amendment filed February 27, 2006.

Drawings

The drawings were received on February 27, 2006. These drawings are acceptable.

Response to Arguments

Applicant's arguments, see pages 25 and 26, filed February 27, 2006, with respect to Claims 1-88 have been fully considered and are persuasive. The rejection of Claims 1-88 has been withdrawn.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tamura et al. (US 4,681,227) discloses a cassette for removable housing a stimuable phosphor sheet for storing a radiation image. Bishop, Jr. et al. (US 4,827,136) discloses a cassette includes a hollow shell having a drawer on which a photostimulable luminescent substrate is attached. Ohta (US 5,381,017) discloses a cassette for a radiation image storage panel having a box member provided with an opening through which the radiation image storage panel is to be fed into and out of the box. However, the prior art does not teach or suggest the top plane has a lower stiffness material than the bottom plane and the sidewalls.
